

Vitamin D3v 400iu Spray 20ml

ProTec
Nutra

Benefits(1)

(EFSA-approved claims in italics)

Vitamin D is an important vitamin:

Vitamin D contributes to normal absorption/ utilisation of calcium and phosphorus and normal blood calcium levels.

Vitamin D contributes to the maintenance of normal teeth.

Vitamin D contributes to the maintenance of normal muscle function.

Vitamin D contributes to the normal function of the immune system.

Vitamin D has a role in the process of cell division.

Vitamin D is needed for the normal growth and development of bones, and vitamin K also contributes to normal bone development.

Vitamin D helps to reduce the risk of falling associated with postural instability and muscle weakness. Falling is a risk factor for bone fractures among men and women 60 years of age and older.

Vitamin D and vitamin K contribute to the maintenance of normal bones.
